To Whom It May Concern

This is to certify that we have been using LUBRILOG make transparent lubricant GEARFLUID 550 in three of our ball mills since April 2017. After the switchover to GEARFLUID 550, the pitting & scuffing that developed during our operation with previous lubricant have been arrested and no further propagation is observed. We have been able to optimize the lubricant consumption with the help of LUBRILOG technical team and overall our lubricant cost has reduced significantly.

We appreciate their after sales service and inspections at regular intervals. We have also used their online cleaning solution LUBRICLEAN EP during the reversal of our Cement Mill-1 girth gear, which allowed us to save a considerable amount of production down time.

We are happy with the performance of Lubrilog products and pleased with their technical support.

I wish them all the best for their future endeavour.
